People

Capacities

FP7 - Indicative Breakdown (€million)

Cooperation

- Support to **trans-national research** activities and cooperation with developing countries
- Promote **research, technological development** and **demonstration projects**
- Develop **multidisciplinary** and **integrate research**
- Consolidate the European leadership in **10 key scientific and technology areas**

- Health
- Food, agriculture and fisheries, and biotechnology
- Information and communication technologies
- Nanosciences, nanotechnologies, materials and new production technologies
- Energy
- Environment (including climate change)
- Transport (including aeronautics)
- Socio-economic sciences and the humanities
- Space
- Security

Cooperation – Breakdown (€million)

Ideas

Implemented via the
European Research Council (ERC),
the first pan-European funding agency for Frontier
Research - Independent Scientific Council

- **Frontier research** on the basis of scientific excellence
- Projects presented by a **principal investigator** and implemented by a individual teams
- **Bottom-up** basis without predetermined priorities
- **Excellence** as sole criterion

Thematic areas:

- Life Sciences
- Physical Sciences & Engineering
- Socio-economic Sciences and Humanities

Objectives:

- Reinforce excellence, dynamism and creativity in European research
- Encourage the work of the established and next generation of independent top research leaders in Europe
- Improve the attractiveness of Europe for the best researchers

People

Building on the successful experience of the Marie Curie actions in the previous EC FPs

Objective:

- Improve the human potential in European research and the career development of the European researchers

Actions:

- Initial Training Networks
- Individual Fellowships (Intra-European; International Incoming and International Outgoing)
- Co-financing programmes at international, national and regional level
- Support a European market for researchers (incentives to mobility)

Capacities

Capacities

Objective:

- Enhance research and innovation capacities throughout Europe and ensure their optimal use.

Areas:

- Research infrastructures
- Research for the benefit of SMEs
- Regions of knowledge and support for regional research-driven clusters
- Research potential of Convergence Regions
- **Science in society**
- **Support to the coherent development of research policies**
- **International cooperation**

Additional Information:
Please be aware that:
■ some browsers, including **Safari**, do not interact well with EPSS (see EPSS_FAQ for more information);
■ the EPSS does not accept proposals **without abstracts**. Please make it an early **priority** to prepare a good abstract.
Our experience shows that the software that some applicants use to convert word processed documents to PDF does not always work correctly. We have also found that applicants sometimes upload the wrong version of the proposal, and that this usually happens in a last-minute rush. We **strongly recommend** that you upload

Area 6.2.1.2 Water resources

ENV.2010.2.1.2-1 Evaluation of effectiveness of economic instruments in integrated water policy

In the context of the integrated water policy, it is essential to evaluate the effectiveness of economic instruments that could enable the objectives of water policy (water quality and quantity management, flood risk management etc.) to be met in a cost effective way. The purpose is to assess the effectiveness and the efficiency of economic instruments (or combination of instruments) including instruments such as incentive water pricing policies, permit trading, and other fiscal, financial or market-based instruments. Research will support the current and future EU water legislation. This project should also consider the water accounting methodology as developed by the Environmental Accounts (e.g. in the statistical standards SEEAW endorsed by the UN statistical Committee in 2008).

Funding scheme: Collaborative Project (small or medium-scale focused research project)

Expected impact: The recommendations on the set of economic instruments that will come out of the project(s) should be used to achieve EU water policy objectives, in a representative set of European environmental and cultural situations.

Collaborative projects (CP)

- Clearly defined scientific and technological objectives and specific expected results
- Carried out by consortia made up of participants from different countries, and from industry and academia.

Coordination and Support Actions (CSA)

- Coordination and networking of projects, programmes and policies.
- Coordination and networking activities, dissemination and use of knowledge
- Studies or expert groups assisting the implementation of the FP
- Support for transnational access to major research infrastructures
- Actions to stimulate the participation of SMEs, civil society and their networks
- Support for cooperation with other European research schemes

Networks of Excellence (NoE)

- For research institutions willing to combine and functionally integrate a substantial part of their activities and capacities in a given field, in order to create a European “virtual research centre” in this field
- Integrated and complementary use of resources from entire research units, departments, laboratories or large teams
- “Joint Programme of Activities” which requires a formal commitment from the organisations integrating part of their resources and their activities

Individual projects

- Carried out by individual national or multinational research in teams, lead by a “principal investigator”,
- Funded by the European Research Council (ERC).

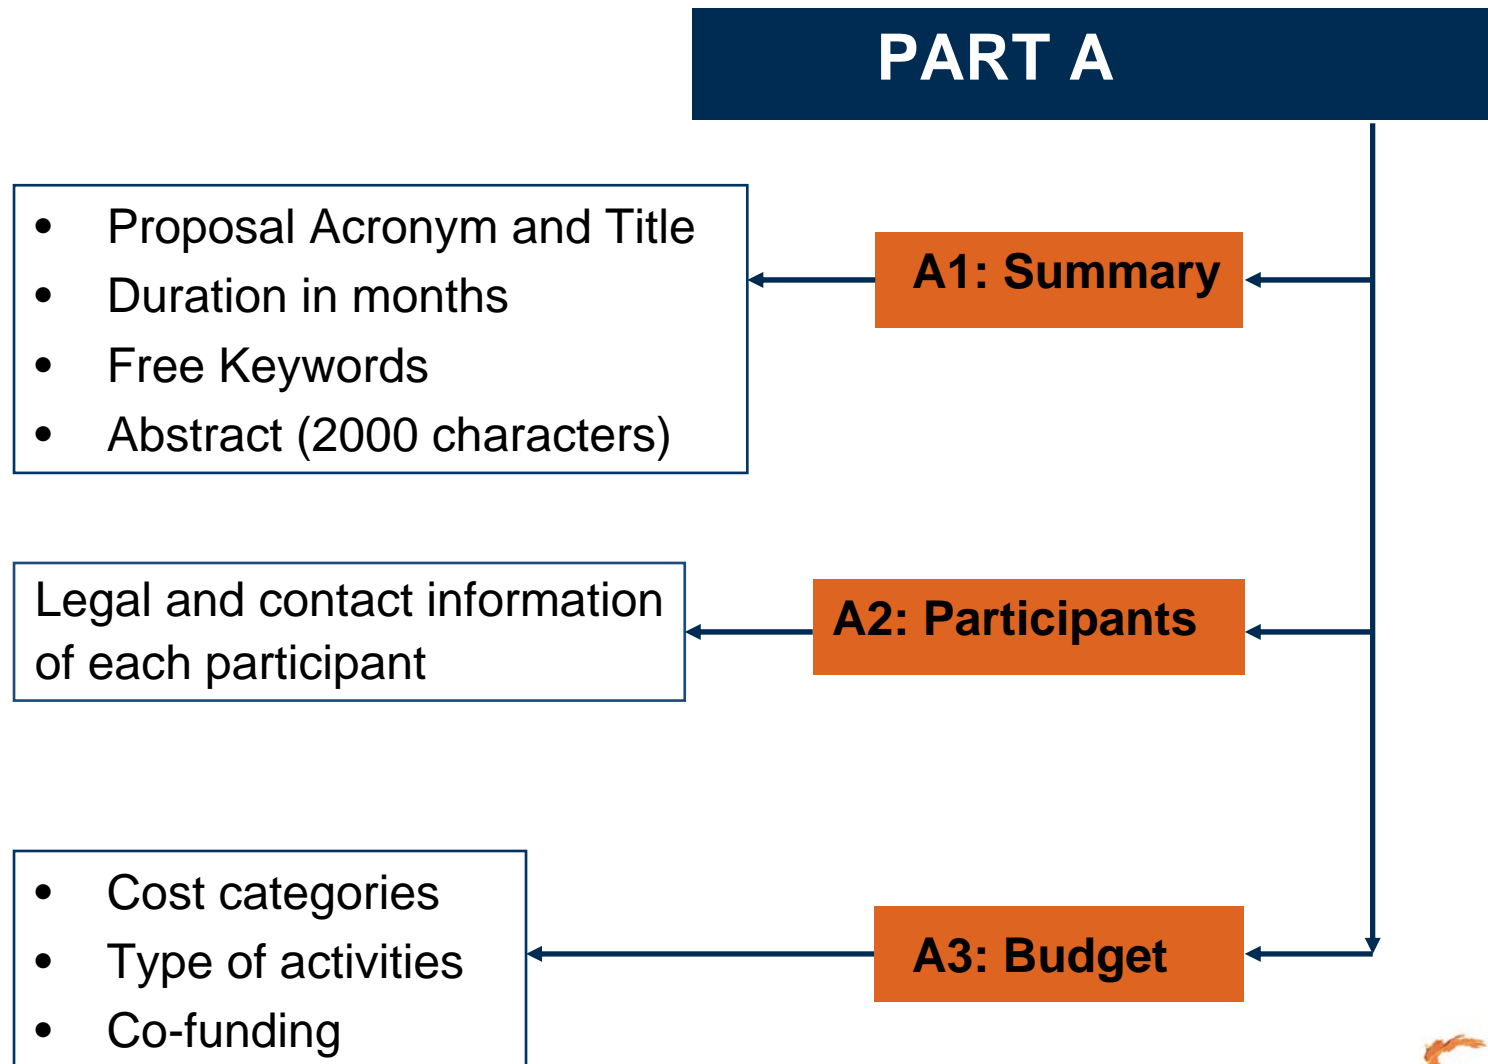

Support for training and career development of researchers

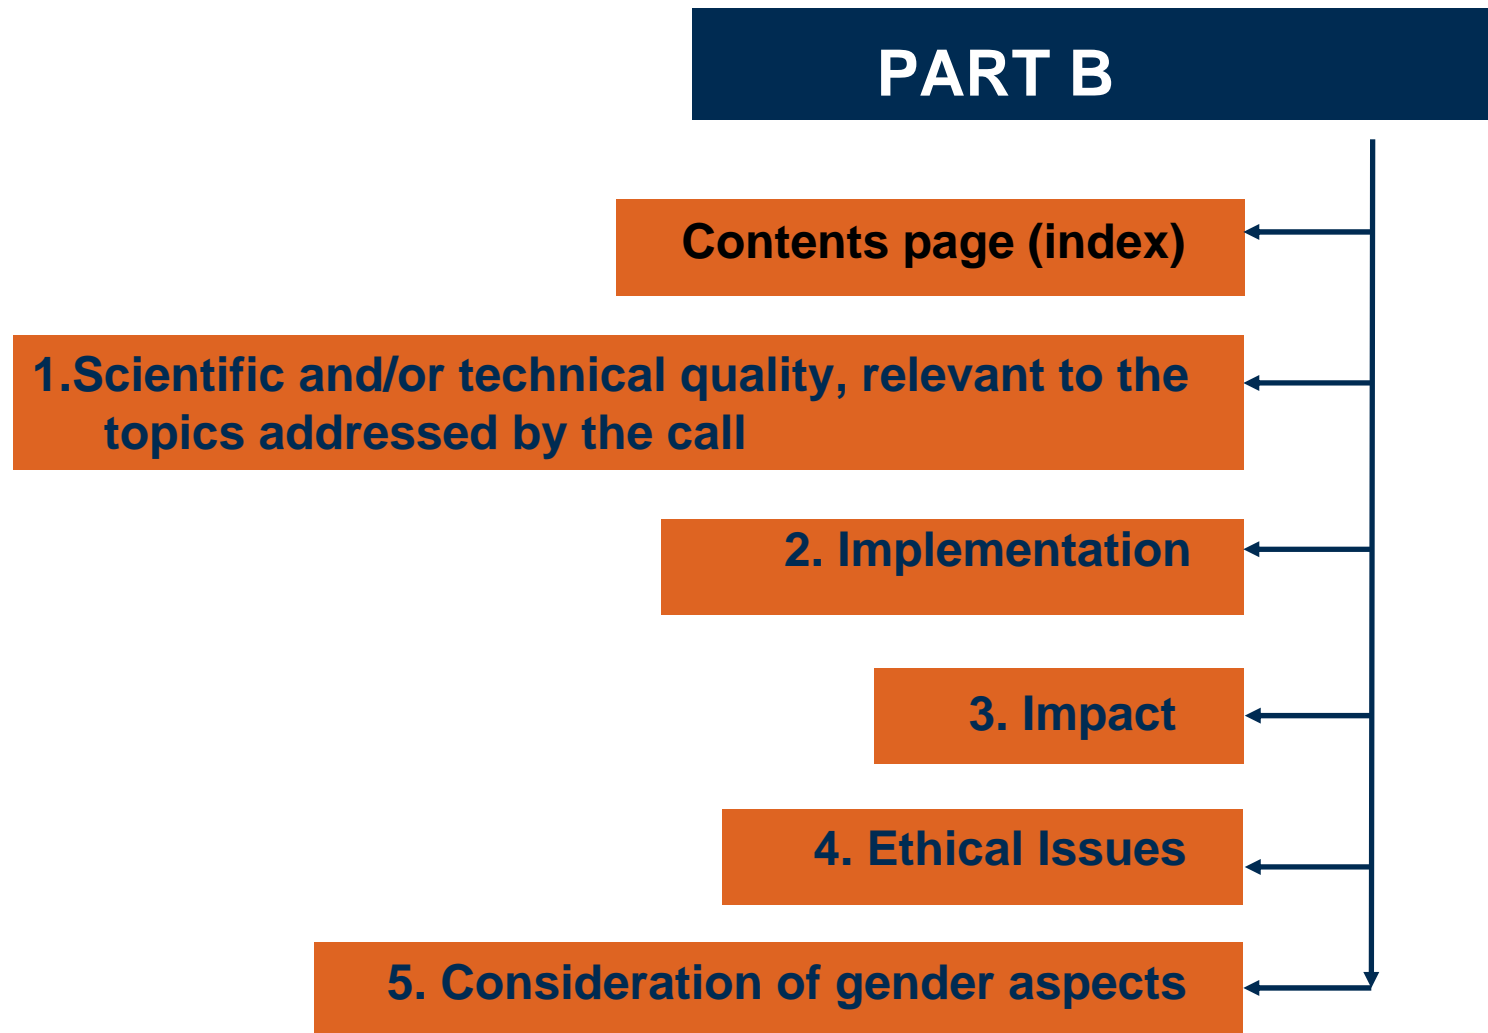

- Training and career development for researchers from across the European Union and its research partners, through a range of support actions named after Marie Curie.

Research for the benefit of specific groups – in particular SMEs

- The bulk of the research is carried out by actors such as universities, research centres or other legal entities, for the benefit of specific groups, in particular SMEs, or for civil society organisations and their networks.

Part B

Contents page (index)

1. Scientific and/or technical quality, relevant to the topics addressed by the call

- 1.1 Concept and objectives
- 1.2 Progress beyond the stat-of-the-art
- 1.3 S/T methodology and associated work plan

2. Implementation

- 2.1 Management structure and procedures
- 2.2 Individual participants
- 2.3 Consortium as a whole
- 2.4 Resources to be committed

3. Impact

- 3.1 Expected impacts listed in the work programme
- 3.2 Dissemination and/or exploitation of project results, and management of intellectual property

4. Ethical Issues

5. Consideration of gender aspects

The basic principle of funding in FP7 is **co-financing**

Reimbursement of direct and indirect eligible costs according to:

- the funding scheme (e.g. public vs private)
- the legal status of the participants (e.g. CP vs CSA)
- the type of activity (e.g. research vs management)

Lump sum amounts, as option for participants from international Cooperation Partner Countries (ICPC)

FP7 Proposals – Budget: Upper funding limits

Maximum reimbursement rates	Research and technological development activities (*)	Demonstration activities	Management of the consortium activities	Other activities
Network of excellence	50% 75% (**)		100%	100%
Collaborative project (****)	50% 75% (**)	50%	100%	100%
Coordination and support action			100% (***)	100% (***)

(*) Research and technological development includes scientific coordination.

(**) For *beneficiaries* that are non profit public bodies, secondary and higher education establishments, research organisations and SMEs

(***) The reimbursement of indirect eligible costs, in the case of coordination and support actions, may reach a maximum 7% of the direct eligible costs, excluding the direct eligible costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary.

(****) Including research for the benefit of specific groups (in particular SMEs).

Type of activity

Research and technological development activities: → Up to **75%**;

Demonstration activities: → up to **50%**

Other activities including dissemination, networking, (not scientific!) coordination, intellectual property rights (patent), studies, promotion of the exploitation of results → up to **100%**

Management activities → up to **100%**

Training and career development of researchers actions → up to **100%**

Coordination and support actions → up to **100%**

Indirect costs:

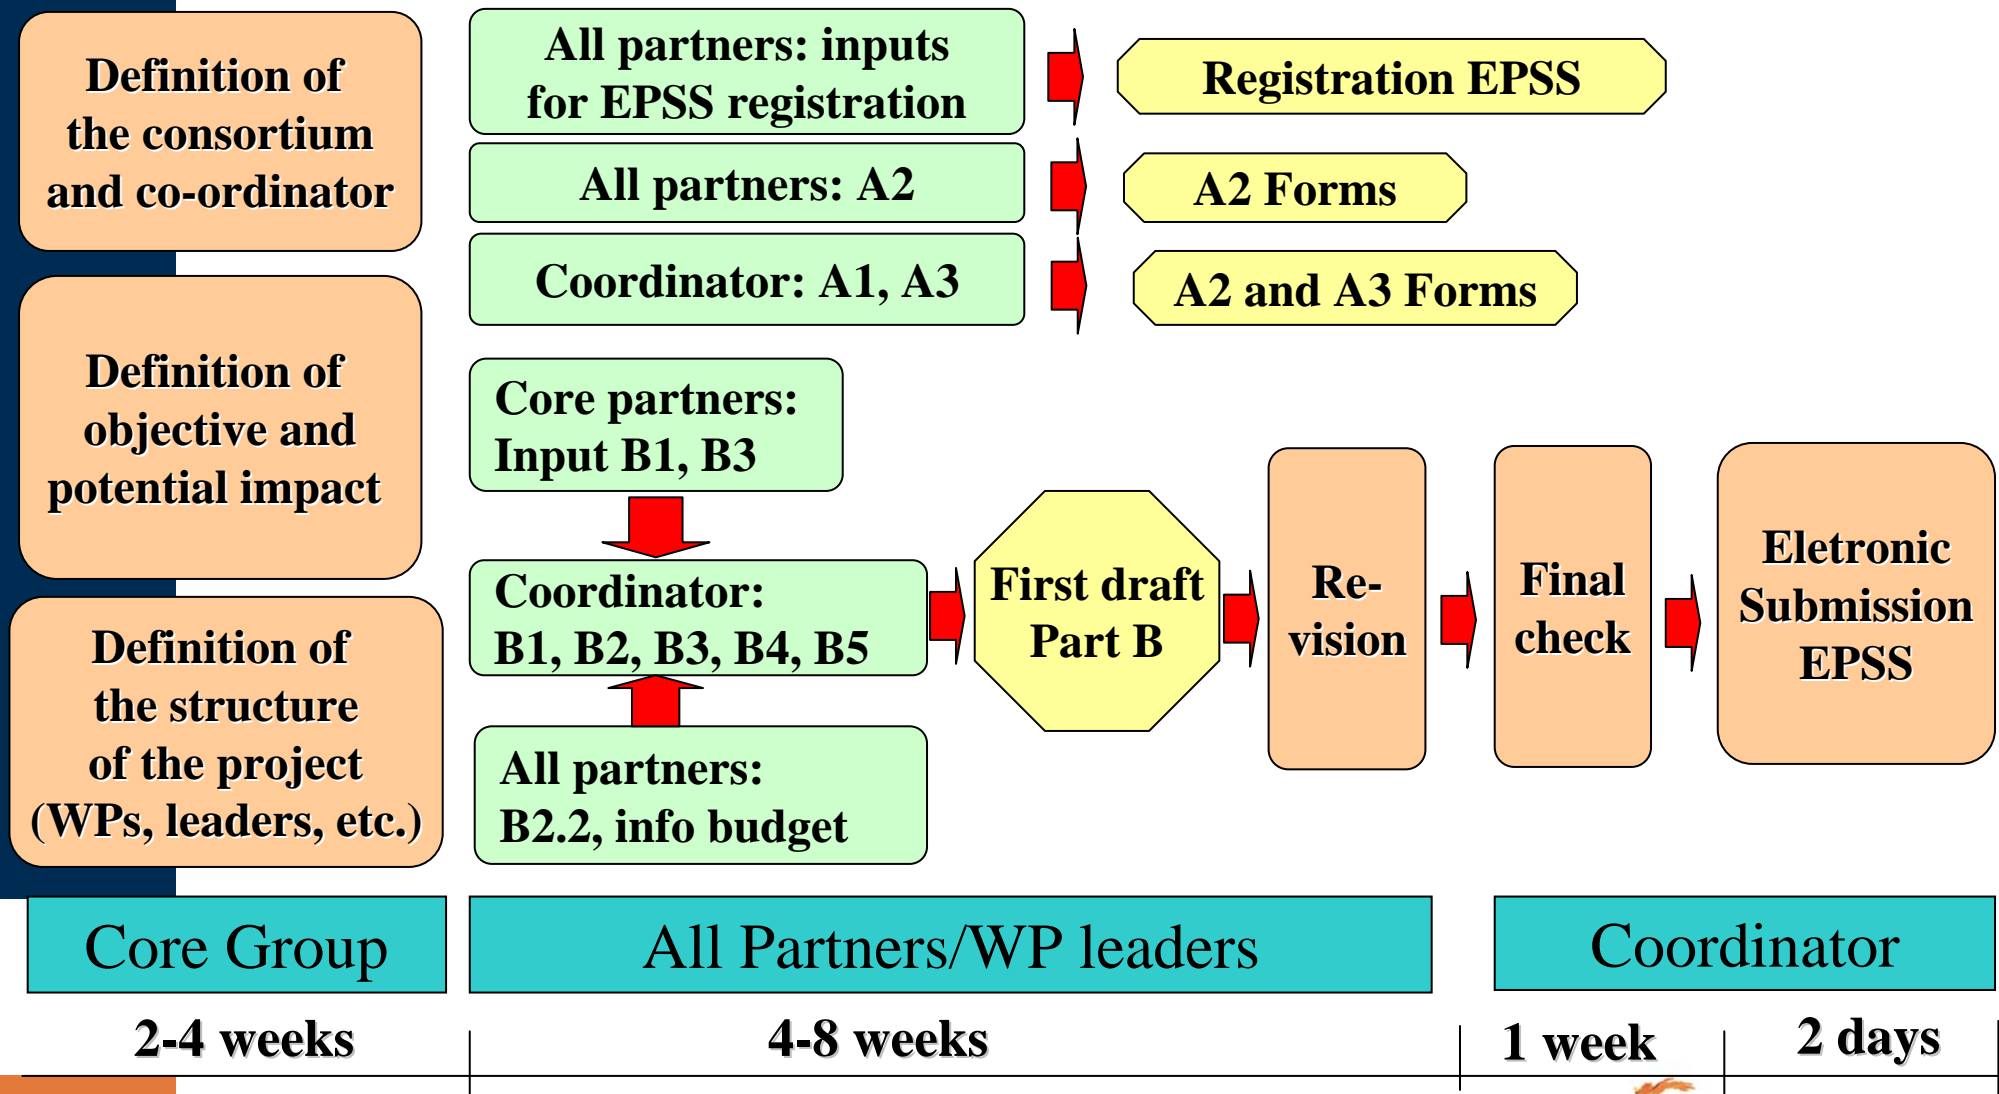

- Flat rate of **20% of direct costs** minus subcontracting
- Confirmed in 2010 the **Transition Flat Rate of 60%** for funding schemes with RTD and demonstration activities
- For **CSA reimbursement up to maximum 7%** of the direct eligible costs

- *Appropriateness of the management structure and procedures*
- *Quality and relevant experience of the individual participants*
- *Individual participants and consortium as a whole*
- *Allocation of resources*

3 - Impact

- *Contribution to expected impacts listed in work programme*
- *Plans for dissemination/exploitation*

Note: Evaluation Criteria adapted to each funding scheme and each thematic area are specified in the work programme

Each criterion is scored 0-5

- Marks can go **from 0 – 5** in steps of 0.5, i.e half-marks are allowed
- Scores must pass ***thresholds*** if a proposal is to be considered for funding

- A. Individual criteria threshold: **3**
- B. Total score threshold: **10**
- C. Total score must be higher than the sum of the individual thresholds
