## 3.7.2 Work Programme

### Area 6.1.3.2 Vulnerability assessment and societal impacts

#### ENV.2011.1.3.2-2 Vulnerability and increased drought risk in Europe

Droughts are increasingly being observed in many regions of Europe, requiring innovative science-based approaches to evaluate the complexity of environmental and socio-economic impacts and people's vulnerability. In the European context, it is essential to improve the understanding of drought processes and occurrences, modelling, forecasting and monitoring, taking into considerations different European geo-climatic regions. Research should capitalise on e.g. studies of historical past events, improve the predictive skills for droughts and develop innovative drought indicators and methodologies for reducing and monitoring the vulnerability of drought-related risks and their impacts to society and the environment, in particular in water stressed areas. These developments should serve as a basis for improving early drought preparedness and risk reduction measures in support of EU policies, in particular the development of Drought Management Plans at EU level, and international policies (in particular the Hyogo Framework for Action).

**Funding scheme: Collaborative Project (small or medium-scale focused research project)**

**Expected Impact:** *Reduction of vulnerability to droughts and identification of the most sensitive areas and sectors in Europe. Better preparedness and risk reduction measures in support of EU policies and international efforts (Hyogo Framework for Action).*

NEW FP7 Calls

**3.8.1 Funding Schemes**

**Collaborative projects (CP)**

- Clearly defined scientific and technological objectives and specific expected results
- Carried out by consortia made up of participants from different countries, and from industry and academia.

**Coordination and Support Actions (CSA)**

- Coordination and networking of projects, programmes and policies.
- Coordination and networking activities, dissemination and use of knowledge
- Studies or expert groups assisting the implementation of the FP
- Support for transnational access to major research infrastructures
- Actions to stimulate the participation of SMEs, civil society and their networks
- Support for cooperation with other European research schemes

54 NEW FP7 Calls

**3.8.2 Funding Schemes**

**Networks of Excellence (NoE)**

- For research institutions willing to combine and functionally integrate a substantial part of their activities and capacities in a given field, in order to create a European “virtual research centre” in this field
- Integrated and complementary use of resources from entire research units, departments, laboratories or large teams
- “Joint Programme of Activities” which requires a formal commitment from the organisations integrating part of their resources and their activities

**Individual projects**

- Carried out by individual national or multinational research in teams, lead by a “principal investigator”,
- Funded by the European Research Council (ERC).

55 NEW FP7 Calls

**3.8.3 Funding Schemes**

**Support for training and career development of researchers**

- Training and career development for researchers from across the European Union and its research partners, through a range of support actions named after Marie Curie.

**Research for the benefit of specific groups – in particular SMEs**

- The bulk of the research is carried out by actors such as universities, research centres or other legal entities, for the benefit of specific groups, in particular SMEs, or for civil society organisations and their networks.

## 4.3

## FP7 Proposals – Budget: General principles

The basic principle of funding in FP7 is **co-financing**

**Reimbursement of direct and indirect eligible costs** according to:

- the funding scheme (e.g. public vs private)
- the legal status of the participants (e.g. CP vs CSA)
- the type of activity (e.g. research vs management)

**Lump sum amounts**, as option for participants from international Cooperation Partner Countries (ICPC)

## 4.3.1

## FP7 Proposals – Budget: Upper funding limits

Maximum reimbursement rates	Research and technological development activities (*)	Demonstration activities	Management of the consortium activities	Other activities
Network of excellence	50% 75% (**)		100%	100%
Collaborative project (****)	50% 75% (**)	50%	100%	100%
Coordination and support action			100% (***)	100% (***)

(\*) Research and technological development includes scientific coordination.

(\*\*) For *beneficiaries* that are non profit public bodies, secondary and higher education establishments, research organisations and SMEs

(\*\*\*) The reimbursement of indirect eligible costs, in the case of coordination and support actions, may reach a maximum 7% of the direct eligible costs, excluding the direct eligible costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary.

(\*\*\*\*) Including research for the benefit of specific groups (in particular SMEs).

#### 4.5.2

### Proposal Evaluation – Scores and Thresholds

Each criterion is scored 0-5

- Marks can go **from 0 – 5** in steps of 0.5, i.e half-marks are allowed
- Scores must pass **thresholds** if a proposal is to be considered for funding

- A. Individual criteria threshold: **3**
- B. Total score threshold: **10**
- C. Total score must be higher than the sum of the individual thresholds
