

“Economy and Society” Research Programme

FEEM Lecture on

“THE GLOBAL REVOLUTION OF UNCONVENTIONAL OIL: NEW MARKETS, NEW GOVERNANCES, NEW POLICIES”

by **John M. Deutch**, Emeritus Institute Professor at the Massachusetts Institute of Technology

Tuesday, March 11, 2014 – 11:00 a.m.

Fondazione Eni Enrico Mattei
Corso Magenta 63
Milan, Italy

The “Unconventional Oil Revolution” is a challenging topic that has profound consequences at both economic, technological and geopolitical levels.

In particular, the rise of US tight oil production could dramatically impact on US domestic and international energy policy strategies, driving a global spin in the world energy scenario.

The expectations on unconventional oil growth and the possibility of a shift in the balance of energy exchange could deeply change the US presence and intervention in some critical areas of the world.

It could also lead to the rise of new players and different approaches in managing complex relations.

John M. Deutch -internationally acclaimed expert on the issue- will deliver an International Lecture on "The global revolution of unconventional oil: new markets, new governances, new policies" to address the complex consequences related to the unconventional hydrocarbons revolution, focusing primarily on US foreign policy, the driving forces leading towards a new world energy balance, the role of new players in a renewed energy scenario and the related political, sociological and geostrategic dynamics.

[John M. Deutch](#)

John Deutch is an Emeritus Institute Professor at the Massachusetts Institute of Technology. He has been a member of the MIT faculty since 1970, and has served as Chairman of the Department of Chemistry, Dean of Science and Provost. Mr. Deutch has published over 140 technical publications in physical chemistry, as well as numerous publications on technology, energy, international security, and public policy issues.

John Deutch has served in significant government and academic posts throughout his career. In May 1995, he was sworn in as Director of Central Intelligence following a unanimous vote in the Senate, and served as DCI until December 1996. In this position, he was head of the Intelligence Community (all foreign intelligence agencies of the United States) and directed the Central Intelligence Agency (CIA). From March 1994 to May 1995, he served as the Deputy Secretary of Defense. From March 1993 to March 1994, Dr. Deutch served as Under Secretary of Defense for Acquisitions and Technology.

From 1977 to 1980, John Deutch served in a number of positions for the U.S. Department of Energy: as Director of Energy Research, Acting Assistant Secretary for Energy Technology, and Undersecretary of the Department.

Agenda

- 11.00 a.m. Introduction and welcome address
- 11.15 a.m. **Lecture by John M. Deutch** - Massachusetts Institute of Technology
"The global revolution of unconventional oil: new markets, new governances, new policies"
- 12.15 p.m. *Questions & Answers*

A light lunch will follow.

If you would like to attend, given the limited availability of seats, we kindly ask you to confirm your presence by writing an email to events@feem.it or by phoning at +39 02.520.36990/33.

For the general public and international audience, we are planning to provide a live-streaming of the lecture. *If you are interested in the service, please write an email to events@feem.it. Instructions for the streaming will be given by email and will be published on FEEM's website the day before the lecture.*
