---

*Since April 2020 I have been working for Fondazione Eni Enrico Mattei supporting the research activities for (often international) projects, where I have been carrying out analyses of scientific documents and data, article writing, database management, document drafting. I also participated in the organisation and management of training programmes, where I had the opportunity to establish relationships with various stakeholders. Thanks to these projects, I accrued very good analytical competences, excellent written and spoken communication skills and fine stakeholder management abilities. I lived and studied abroad and for this reason I am open and inclined to have experiences in foreign contexts.*

*I have a Degree in Law at Sapienza Università di Roma and a MA in Energy & Green Management.*

---
